

Applications for Classroom and Student Use

Click on underlined words for links connected to the app or articles with more app resources.

- Skitch: Get your point across with fewer words using annotation, shapes and sketches, so that your ideas become reality faster.
- Evernote: A note taking app that you can use across computers and mobile devices. The automatic sync feature allows you constant access to your information. In the classroom, students can use Evernote to take notes, develop their writing, and share their notes through email.
- bitly: Easily shorten URLs and more
- Class DOJO: Easily capture behavior & participation data about your students to share with administrators and parents
- Scratch: Create games, animations, and more...
- Padlet: Teachers create a wall where students can post their thoughts, pictures, and videos about a topic. Teachers can choose if the wall is shared just with the class or to the general public. It can even be added to your teacher website or blog.
- Study Blue: Create note cards for studying
- BrainPop: Brings learning to your students' fingertips
- QR Code Generator: Create a QR code
- Khan Academy: Access free videos for learning
- AWW: Web Whiteboard is a touch friendly app that lets you use your computer, tablet, or smartphone to easily draw sketches, collaborate with others, and share them with the world.
- Vimeo: Store and share your videos
- Gaggle: Teachers can assign, collect, and grade assignments.
- Socrative: Teachers can easily assess students using Socrative by creating an online quiz or exit ticket that students can access on their mobile device or computer.
- LiveBinders: 3 Ring binders on the web
- Zondle: Add your content and the app creates learning games for students – free for educators
- Top Apps for the English Classroom
- Quizlet: Study anything for free.
- Dragon Dictation
- Dropbox
- EasyBib
- Animoto Video Maker
- Math App List for simple math skills
- Alphabet Projector: Letter recognition practice

April Sanders,
Ph.D. - an
assistant
professor in the
Education
Department at
Spring Hill
College (Mobile,
Alabama)

- YouTube: One of the single-most popular apps on earth, regardless of platform or device, YouTube is the modern television, and is likely installed—or at least accessible—on every device in your students’ pockets.
- Google Drive: Students can develop their writing and share it with other students and teachers for feedback. Users can create documents, spreadsheets, and slideshows that automatically save.
- WordPress: Teachers can start a blog to give students easy access to all the links they are using for lessons in the classroom.
- Kid Blog: A safe site for students to create their own blogs to share with other students and the teacher.
- Livebinders: Another way to organize and share information online with students. Teachers can collect articles, pictures, and links on different topics for lesson plans. LiveBinders also has several “binders” accessible to the public that are dedicated to BYOD
- Discovery Education: A service that allows teachers to design lessons and gather links for students to explore. The free resources area includes a library of videos, pictures, articles, and lessons.
- Tumblr: Tumblr in education doesn’t get much attention, which is odd because there may not be a simpler or more elegant way for students to share a wide variety of media, from text to images, video to gifs.
- Sight Words for Reading
- SkyORB: 3D astronomy
- Virtual Manipulatives
- Link to 55 Free apps for educational use
